## GUARANTEE BY BREEDER

1. Breeder guarantees that the cat listed above is a purebred Ragdoll , with an accurate pedigree, and is eligible for registration in either or both; Cat Fanciers Association (CFA) or The International Cat Association (TICA).
2. Breeder further guarantees that this animal is negative for FeLV and FIV at the time of leaving the cattery, and in good health. The cat has been vaccinated at least once, and is free of internal parasites, and if purchased as a breeder is free from genetic defects.

There is no guarantee for kittens or cats when tested for Coronavirus as the test is not specific to a single Coronavirus. There is no guarantee if the buyer uses the FIP vaccine, as FIP may be potentiated by such.

3. If purchased as a PET this kitten is guaranteed for the first 2 years against a GENETIC problem so severe that it prevents the animal from living a normal life as a pet, i.e. HCM, Hip Dysplasia. Upon receiving written proof of a diagnoses of severe HD by an OFA or Penn Hip certification, or diagnosis of HCM by a certified Veterinary Cardiologist, the Buyer will receive a replacement with another kitten of equal quality as soon as available. Buyer may keep the original cat. Breeder is not responsible for any vet bills incurred. Buyer must provide a death certificate issued by a veterinarian in the event of a death in order to qualify for a replacement kitten.

4. If, during the initial veterinarian visit (with-in 72 hours of receipt), a diagnosis of disease other than stress-induced minor upper respiratory infection is made, Buyer agrees to provide a written report, signed by the examining licensed veterinarian, including the diagnosis and all test results the diagnosis is based on.

The Breeder has the right to request a second opinion from a Veterinarian of the Breeders choice, at the Breeders expense. Upon confirmation the Breeder is obligated to pay for the treatment of the diagnosed illness, up to 1/2 of the purchase price of the animal. The Buyer may, at his option and within five days of the veterinary diagnosis elect to either a)cancel this contract and be refunded the purchase price, or b) accept a replacement animal, when available. The Breeder may, at his option and within the same five day period, elect to cancel this contract and refund the purchase price to the Buyer. All costs associated with shipping will be the responsibility of the Buyer.

5. If Kittens sold as Breeder/Show prove to be sterile from congenital or hereditary conditions, the Breeder has the option of offering to the Buyer: a) upon altering of the original cat, replacement with the next available equal quality cat or kitten; or b) refund the difference between Breeder/Show and Show/Alter price. Show-Alter price is \$\_\_\_\_\_ (Sterility caused by an infectious agent is not covered by any guarantee.)

6. There is no refund or replacement given if this cat is successfully bred before having its Hips X- ray'd for hip dysplasia, with the results turning up positive through an OFA or Penn Hip reading, or a positive HCM result from a Board Certified Veterinarian Cardiologist.
